## ENVIRONMENT

- 60% sustainable, rapidly-renewable content: EthEco® wool is sourced from non-mulesed sheep cared for on holistically-managed farms.
- Environmentally Improved Production Process: Reduced water and energy use, reuse of water (30%), recycling of waste, no hazardous substances such as heavy metal dyes.
- Wool absorbs indoor air contaminants, benefiting indoor air quality.
- 40% low-VOC polyester.
- 60% biodegradable and recyclable.

## GREEN STAR + LEED

- LASER is certified to the EU Ecolabel.
- LASER can be used on white and upholstered furniture certified by AFRDI, GECA, ECNZ and Ecospecifier (Level B + C).
- The Green Star Rating Tool states “Where at least 90% of an item’s mass is certified to a GBCA recognised standard, the item can be entered as a certified product at Level A, B or C.” Therefore any fabric can be used as fabrics are almost always under 10% by weight of a furniture item.
- 60% rapidly renewable content contributes to LEED MR Credit 6 Rapidly Renewable Materials.
